Profitable & Proven

CUSTOM TAILORED SOLUTIONS

Armstrong Development Properties, Inc is a fully integrated real estate development and management company that provides solutions on a local, regional and national scale. Throughout the nation, Armstrong has developed strategic alliances with market leading design consultants who share a business philosophy paralleling that of our company. By partnering with these design consultants, Armstrong’s fully-integrated development team can provide specialized services for your project including:

- Land Use, Planning & Due Diligence
- Architecture
- Interior Design & Tenant Improvements
- Civil, Geotechnical & Environmental Engineering
- Materials Testing / Special Inspections
- Signage
- Land Acquisitions, Land Use & Zoning Attorneys

LAND PLANNING, ENTITLEMENTS & PERMITTING

Armstrong is a market-leader in planning, entitlements, and permitting in municipalities and agencies throughout the country. Fortune 50 retailers depend on Armstrong to obtain the discretionary approvals required to make their projects reality. With over 500 projects successfully entitled and permitted across the country in the last 10 years, our development team has the experience, knowledge, and most importantly, the RELATIONSHIPS, to make it happen.

Flexibility & Adaptability

FLEXIBLE SOLUTIONS

Armstrong’s experienced development team can provide services that are tailored to both the budget and needs of your specific project, regardless of size or complexity:

- Feasibility Studies + Land Acquisition
- Planning + Entitlements + Permitting
- Entitlements + Permitting + Const Management
- Construction Management
- Property Management

CONSTRUCTION MANAGEMENT

Armstrong offers professional construction management services that are tailored to the size and complexity of any given project – and backed by a corporate commitment to total quality management. Armstrong’s construction management services begin with, and typically include:

1. ACQUISITIONS

The acquisitions stage is the overall process to identify, assess, and acquire a property. Although the term acquisition is synonymous with taking free title to a piece of property, Armstrong’s capabilities extend to negotiation and execution of ground lease, space lease, build-to-suit, reverse build-to-suit, and strategic land purchase projects. Services typically include:

   - MARKET RESEARCH / COMPETITION PROFILING
   - APPRAISAL / OPINION OF VALUE
   - DUE DILIGENCE / FEASIBILITY ANALYSIS
   - PURCHASE AGREEMENT / LEASE NEGOTIATIONS
   - DEVELOPMENT / NEGOTIATIONS OF CC&R / ECC&R

2. DUE DILIGENCE / FEASIBILITY

The due diligence / feasibility stage is the investigative and / or assessment process used to identify, prevent, or mitigate foreseeable risks, conditions, and land-use stipulations associated with acquisition and development of a property. Services typically include:

   - SITE INSPECTION
   - CONCEPTUAL SITE PLAN
   - TITLE REPORT
   - ALTA / TOPOGRAPHIC SURVEY
   - GEOTECHNICAL REPORT
   - PH 1 / PH 2 ENVIRONMENTAL SITE ASSESSMENT
   - BIOLOGICAL ASSESSMENTS
   - SIGNAGE SURVEY
   - LAND USE / ZONING RESEARCH
   - PRELIMINARY OPINION OF PROBABLE COST

3. PROGRAMMING

Programming is the collaborative process used to identify the Stakeholders or end-user’s needs and objectives of a project. Services typically include the initial (or refined) definition of:

   - PROJECT SCOPE OF WORK
   - PROJECT CONTROLS: BUDGET / SCHEDULE
   - PROJECT KEY PERSONNEL & DESIGN CONSULTANTS
   - TENANT / END-USER REQUIREMENTS
   - DEVELOPMENT / LAND USE / ZONING REQUIREMENTS
   - PRELIMINARY ENGINEERED SITE PLAN
   - PRELIM ELEVATIONS / BUILDING CONSTR MATERIALS

4. ENTITLEMENTS

The process of entitlements is the legal method of obtaining discretionary approvals for the right to develop and / or construct on a property for its desired use(s). Services typically include preparation and / or submittal of the following:

   - FINAL ENGINEERED SITE DESIGN
   - Refined definition of project scope of work
   - Refined definition of budget / schedule
   - Engineered site plan
   - Preliminary / final plat
   - Architectural elevations / renderings
   - Variance requests
   - Special use permits
   - Driveway access permits
   - Liquor licensing
   - Public hearing(s)
   - Planning & zoning hearing(s) / preliminary site plan approval
   - City council hearing(s) / final site plan approval

5. PERMITTING

Most often, the permitting process is initiated following the discretionary approvals procured during the entitlements phase (although in some instances, permitting can be run concurrently with the entitlements process). Services typically include preparation and submittal of the following:

   - Final engineered construction documents
   - Final architectural & engineering CD's
   - Hydrologic design report
   - Dry utility coordination
   - Constructibility / design coordination
   - Administrative code compliance review
   - Calculation of permit, review, & impact fees

6. CONSTRUCTION MANAGEMENT

Construction Management is the delivery stage, and culmination of, the entire development process. Services typically include:

   - MGMT of design consultant team / deliverables
   - Quality assurance / Quality control review(s)
   - Constructibility / value engineering review(s)
   - Procurement / project bidding
   - Bid phase services (RFP's)
   - Contractor qualification / selection recommendation
   - Contract negotiation / risk apportionment analysis
   - Contract administration
   - Critical path scheduling / project controls (schedule)
   - Construction coordination / progress meetings
   - Coordination of RFQ's, shop drawings & submittals
   - Project documentation (progress reports / photos)
   - Project accounting / project controls (budget)
   - Materials testing / special inspections
   - Inspections & approvals for occupancy
   - As-built construction documents
   - Coordination of commissioning
   - Project / contract close-out documentation
   - Project audits
   - Coordination of warranty items
